

To Whom it May Concern:

I have been a listner to XM for around 2 years going on three.

I am wondering how Traffic reports could be a major issue here.

Orlando radio simply does not have frequent enough traffic reports, and by the time you tune in one, you miss all 30 seconds of it and especialy the part that effects you personally.

My travle time is 20 min to and from work. I cannot afford the distraction of changing channels to get a traffic report. I turn on xm and I get my report when I need it and not when the radio says I need it.

This allows me to make alternate travle plans and helps prevent traffic at the accident scene witch is a plus for all those who may be rendering help.

I know money is a driving force here, but common sense should prevail here.

I am willing to pay for the service if need be.

We all could benefit from this service, from commuters to rescue personel.

Please let your own personal traffic situations and ours help you to make the correct choices.

Thank You:

Jeffrey E. Powell
